Weight, 12 Trowels 10 lbs.

- 1 Tilt control with nylon collar permits easy trowel adjustment.
- 2 Throttle control at Operator's finger tips.
- 3 Clutch control. Trowel stops instantly when lever is released.
- 4 Extra long, high strength handle for better operator control.
- 5 Positive ball bearing thrust V-Belt clutch. Permits slower trowel speed without stopping when engine is run at slow speed.
- 6 Worm gear drive with Timken Bearings enclosed and run in oil.
- 7 Extra strong stationary ring lets you work up close, permits adding weights or sand bags, when needed.
- 8 Three or four blades on same trowel in minutes. Remove one trowel arm, reposition the other two arms on support plate and you have a three bladed trowel.
- 9 Low center of gravity. Perfect balance and stability.
- 10 Three, five and seven HP Briggs & Stratton gas engines.
- 11 Lifting Ring
- 12 Spring cushion in clutch rod for perfect control at handle.

MARSHALLTOWN EXCLUSIVE "PLUS" FEATURES

- Extra flexibility of 3 or 4 blade troweling with the same machine. Simply remove 1 trowel arm, reposition the remaining 2 arms on the support plate and you convert, in minutes, to 3 or 4 blade troweling. This exclusive "extra" gives you unequalled versatility—the right machine for all job requirements.
- Positrol manual clutch stops trowels instantly when released—permits lower trowel speed. Ordinary centrifugal clutches require high engine speed and resultant high trowel revolutions for operation. Not so with the new Positrol manual clutch as clutch can be engaged or released at any engine speed. Troweling can be done at idling speed if desired. The perfect "deadman's control" does not kill engine.
